

Protection beyond policies

Maintaining business continuity and driving shareholder value require a reliable supply chain. We can help you proactively address your supply chain risk to prevent interruptions when you can, and mitigate them when you can't.

Every company is threatened by supply chain risk. Taking out insurance to protect yourself is key – but what if you could reduce the chances of being negatively affected in the first place?

We can help you implement a solution that will automatically monitor the health of your entire supply chain. Real-time monitoring will alert you to problems that could bring your business to a halt, giving you the opportunity to prevent them before they do.

Zurich Supply Chain Risk Management Services is a cooperation with riskmethods, a global, award-winning market leader in supply chain risk management. Together, we can reduce the risk to your business by giving you a more reliable supply network.

As a result of progressive globalization and the associated increase in dynamics and complexity, it is becoming more and more difficult to ensure an overview of evolving or changing risks.

Daniel Jung, Head of Strategic Procurement, Swiss Steel

About riskmethods

riskmethods was born with a singular mission: to create a world of reliable supply networks. When riskmethods was founded in 2013, supply chains were becoming more and more vulnerable to risk, and companies around the globe needed a way to navigate that risk more effectively. riskmethods is trusted by hundreds of brands to protect thousands of products from the supply chain risk that threatens every company.

The riskmethods Solution is powered by Risk Intelligence™, a technology-driven service that uses artificial intelligence to comb through millions of data sources and zero in on the real risk to your supply chain. Thanks to years of machine learning, riskmethods' AI has learned how to tell you only what you need to know, exactly when you need to know it.

Zurich Supply Chain Risk Management Services combines technology, risk engineering expertise and insurance to help you identify, assess, mitigate and transfer supply chain risks.

When our supplier was hit by a fire, riskmethods alerted us 30 hours before the supplier did. Because we acted fast to find an alternative source before market prices increased, we realized a purchasing advantage worth \$300k.

André Hahn, Stockmeier Group

Identify your risks with riskmethods Risk Radar™

- See real-time insights about the health of your entire supply network via dashboards and an **interactive world map**.
- Generate and compare **risk scores** using both an out-of-the-box and fully customizable scorecard.
- Benefit from AI-driven technology that generates **relevant alerts** so you are the first to know about a risk impacting your supply chain.

Assess your risks with riskmethods Impact Analyzer™ and Zurich's risk management tools

- Generate **impact scores** for all your suppliers by category to understand exactly how a risk event might disrupt your supply network.
- Benefit from the **potential of Zurich's risk management tools** (e.g. Zurich Risk Advisor) to enable comprehensive impact profiling.
- Compare suppliers' risk score and impact score to **identify critical vulnerabilities**, and model what-if scenarios.

Mitigate your risks with riskmethods Action Planner™ and Zurich Risk Engineering

- Benefit from **Zurich Risk Engineering expertise** in developing business continuity plans (including potential impact from climate change).
- Rely on plans to help you take immediate, decisive and **preventive actions for all types of risk**.
- **Automate workflows and assign user tasks** so that everyone knows exactly what to do and when to do it.

Benefits for your business

Thanks exclusively to riskmethods, we knew about a supplier entering bankruptcy four weeks before it was public knowledge and were able to qualify an alternative supplier early on.

Corinna Lichtenegger
Department Manager Supply
Management Category, Lindner AG

- **Maintain business continuity.**
Keep your business running by proactively addressing and responding to supply chain risk. Be the first to know, the first to act and the first to recover.
- **Improve Supplier Relationship Management.**
Make sure you have all the right information at your fingertips to make risk-aware supplier decisions.
- **Create Efficiency through Digitization.**
Be faster, smarter and better by using riskmethods artificial intelligence to automate processes that are beyond human scale.
- **Help your bottom line.**
Take advantage of predictive insights that will help you avoid costs by addressing risk before it happens.
- **Improve your risk profile and access Zurich Business Interruption and Contingent Business Interruption coverages at preferred conditions.**
